

Tecla inizia a dilatare la propria proposta differenziando l'offerta tra grandi consolle e lavabi pienamente coinvolti nell'attualità dell'arredo.

Tutto nell'ambito di un design che attraverso le proporzioni definisce la leggerezza delle linee e la sinuosità delle superfici. Proprio la gradevolezza tattile di queste ultime, con le loro sofisticate colorazioni, sono un'ulteriore caratteristica della qualità che accompagna questa nuova produzione.

Tecla begins to broaden its range, differentiating between large consoles and washbasins that are fully integrated into contemporary furnishings. All this within a design whose proportions define the lightness of the lines and the sinuosity of the surfaces. The tactile qualities of the latter, with their refined colours, are another feature of the quality that accompanies this new production.

SUPERFICI PERFETTE CON LO SMALTO *Teclasanit*

PERFECT SURFACES WITH *Teclasanit* GLAZE

Dalla costante attività di ricerca e sviluppo di Tecla Group nasce l'innovativo smalto *Teclasanit*, studiato e testato per assicurare performance estetiche elevate e durevolezza nel tempo.

From Tecla Group's constant research and development comes the innovative *Teclasanit* glaze, designed and tested to ensure high aesthetic performance and durability.

LAVABI DAI BORDI SOTTILI

WASHBASINS WITH THIN EDGES

Il nuovo ed esclusivo impasto ceramico, inoltre, permette di realizzare lavabi che raggiungono uno spessore di soli 6mm e ne mantiene inalterati stabilità e geometria.

The new and exclusive ceramic mixture reduces the thickness of the washbasins up to just 6 mm and keep design unaltered.

UNA SUPERFICIE RESISTENTE E ANTIBATTERICA

A RESISTANT AND ANTIBACTERIAL SURFACE

Lo scrupoloso controllo in tutte le fasi di cottura delle ceramiche assicura al processo di sinterizzazione un'eccellente uniformità del prodotto, con una superficie non porosa, specchiante e resistente a macchie e abrasioni. Inoltre, l'azione del trattamento antibatterico dona alle ceramiche maggiore brillantezza resistenza e igiene, garantendo un prodotto più pulito e sicuro, testimone dell'attenzione di Tecla Group per la salute delle persone.

From the sintering process, a homogenous product is obtained with a smooth, mirror-like surface that is resistant to stains and abrasion. Thanks to the combined action with the antibacterial liquid treatment, surfaces are more impermeable to germs and bacteria. The result is cleaner and safer sanitaryware, a proof of Tecla Group attention to people's health.
